NIPHA

ROTARY TILLER BLADES

Product Range:

NIPHA is manufacturing more than two dozen types of rotary tiller blades and has the technology and expertise to develop newer ones.

NIPHA Rotary Tiller Blades are compatible with most Indian and International rotary tiller brands.

Specifications & Features:

NIPHA blades are made from durable high carbon & spring steel grade AISI 1070, AISI 1080, EN 45, SUP 9, Boron Steel and equivalent. NIPHA blades are heat treated, stress relieved and shot blasted to provide extra strength and uniform hardness throughout. This process ensures that NIPHA blades have optimal elasticity and resistance to shocks and strain. These blades usually have a hardness equivalent to 45-50 HRC providing it with superior wear resistance and fatigue life.

All of NIPHA's products are subjected to stringent in process quality assurance and continuous testing.

NIPHA

After having sold rotary tiller blades for many years to the world's most discerning customers and markets of USA, Europe & South East Asia, NIPHA has entered the Indian market. Backward integration of manufacturing facilities provide NIPHA an edge over its competitors.

Advantages of using NIPHA Rotary Tiller Blades:

- ★ NIPHA rotary tiller blades can be used for long durations
- ★ There is minimal load on the tractor and rotary tiller due to consistency in weight and shape of NIPHA blades.
- ★ There is very little bending or breaking even in tough soil conditions because of optimum heat treatment that ensures uniform hardness and fine grain structure.

CULTIVATOR TINES

NIPHA tines are made from durable high carbon & spring steel grades and equivalent. NIPHA tines are heat treated, stress relieved and shot blasted to provide strength and uniform hardness throughout. NIPHA tines have greater wear life compared to other tines available in the market.
